

# RSV Antigen Test

The RSV Antigen Rapid Test cassette is rapid chromatographic immunoassay for the detection of respiratory syncytial virus (RSV) antigen (viral fusion protein) in human nasal/nasopharyngeal swab, nasal/nasopharyngeal aspirate samples. It is intended as a screening test and as an aid in the diagnosis of RSV respiratory infections.

## FEATURES

- Health Canada Class II licensed.
- Rapid and accurate results within 15 minutes.
- Applicable for both nasal/nasopharyngeal swab, and nasal suction fluid use

## SPECIFICATIONS

- 20 tests/kit
- Storage: 2-30°C/36-86°F
- Shelf life: 24 months
